Tips to Reduce Drug Cost and Maximize Medication Efficiency

Review Medications Every Quarter

Keep a single, updated list of all your medications and ensure that each of your healthcare providers has a copy. This helps reduce the risk of unnecessary drugs, side effects, and interactions. Regularly review this list with your physician or pharmacist.

Talk with Your Doctor about Cost

Let your doctor know that cost and therapeutic effectiveness both matters. Ask if there is a generic or lower-cost substitute available.

Use the Patient Portal to Compare Prices

Sav-Rx Patient Portal will give you cost comparison of medications.

Avoid Free Samples

Free samples are usually brand name and more expensive in the long run.

Ask your Pharmacist for Information

For information on generic medications, consult your pharmacist. Discuss the cost and efficacy of generic alternatives with your doctor.

Ask for Smaller Amounts of New Meds

Ask your doctor for a smaller quantity of a new medication until you know it is right for you. This is especially helpful if you are paying cash or have a high copay.

Call Sav-Rx at 866-233-(IBEW) 4239
